"We believe there is immense capacity to help clients manage the challenges arising from new regulations and we will continue to develop the material infrastructure required to navigate these challenges and help the industry reach a healthy steady state."

Andrew Williams, CEO

Capital Optimisation

Our new capital optimisation service leverages our proven technology to optimise risk-based capital. Our advanced algorithms rebalance exposures via new trades or backloading to reduce risk and improve capital efficiency.

- As the first optimisation service to be licensed by ISDA for benchmarking of standardised approaches (SA), we are trusted to help participants optimise their risk-based capital under SA-CCR.
- As regulatory models and requirements change, we continue to evolve and are extending our optimisation engine to support other capital models and metrics.

What we target.

SA-CCR

Stress Test / CCAR

Large Exposures

IMM

Initial Margin Optimisation

Our optimisation service is designed to reduce counterparty risk and the costs associated with funding initial margin (IM). Our unrivalled algorithms rebalance portfolios by generating new market risk neutral trades that reduce risk and release capital.

- Our market leading service is proven to deliver a material reduction in margin costs across bilateral and cleared portfolios – often in excess of 50%.
- We increase efficiency by offering unrivalled straight-through-processing - and connect to Acadia and other industry partners.

Asset classes we optimise.

FX

Equities

Rates

Commodities (Gold)

Compression

Our multilateral interest rate compression service reduces gross notional and trade count while preserving the overall risk profile and valuation. Powered by unbeatable algorithms and backed by unmatched quantitative analytics, we clean portfolios, increase efficiency and improve returns.

- We enable clients to manage reset risk and transition their LIBOR exposures to risk-free rates within our standard compression process.

- We also offer an internal compression service which reduces trade count and notional between different desks or entities within the same group.

Trades we compress.

- Interest Rate Swaps
- Compounding Swaps
- Forward Rate Agreements
- Zero Coupon Swaps
- Basis Swaps
- Inflation Swaps
- Overnight Index Swaps

QUANTILE

How are we different?

Run faster.
Run better.

Our algorithms are built for performance and are renowned to be fast and agile.

Trade together.
Optimise together.

We have an extensive network, including all of the world's largest dealer banks, regional banks and other large institutional market participants.

Reactive to change.
Proactively game changing.

We host regular working groups with the market which enables us to deliver what the industry wants, and what it needs.

Time well spent.

Our pricing structure is transparent and promotes regular and proactive participation.

Join our next run

Discover the Quantile difference by joining our next run. We offer regular runs for our interest rate compression, initial margin optimisation and capital optimisation services.
